

## Home

Empowering Kids! is a site dedicated to empowering kids by empowering their parents, teachers and anyone else with whom kids are connected.

The book, Mining the Gold in Every Child: Empowering Kids in the New Millennium contains a wealth of information for every parent and teaching professional on how our educational system works and what helps children be successful in school. More books and booklets with fun, quick and easy lessons of high interest for kids in grades K-12 are coming soon!

Check out the free items of this newly revised site! In addition to the monthly newsletters with quick and easy lessons that can be printed and freely distributed, there are resources including games and downloads such as powerpoints to use in presentations.

I believe that: Every child is unique and different. Every child can learn and deserves a chance to have a quality education. Inside each child is a vein of gold, just waiting for someone to bring it out and let it shine!

I hope that the site is useful to you. Please feel free to send along your comments, ideas and suggestions. To contact me, send an email to: [info@empoweringkids.com](mailto:info@empoweringkids.com)

Smiles,

Elaine
